MySQL | API | Git | GitHub

Frontend | Backend | Full-

Stack

## Experience

**Intern - Web Development | DevTown | Nov 2022 – Jan 2023**

- Orchestrated the seamless integration of modularized React components into the existing codebase, resulting in a 25% performance enhancement and a 50% reduction in bug count.
- Developed and maintained 6 React components, significantly expediting development by 40%.
- Amplified mobile user engagement by 60% through responsive design.

## Projects

**BookMyShow | Nov 2022**

- Engineered a replica of the BookMyShow website using React and Tailwind CSS.
- Incorporated API calls to procure and display movie listings, theater details, and showtimes.
- Realized an 80% increase in user engagement through a user-friendly, responsive design.
- Gained hands-on experience in the latest front-end web development technologies and API integration.

**Zomato Clone | Dec 2022 - Jan 2023**

- Utilized React.js, MUI, and Tailwind CSS to craft a responsive and intuitive user interface.
- Engineered back-end functionality with Node.js and Express.js, establishing a robust MongoDB database system to proficiently store and retrieve restaurant data, menus, user reviews, and user profiles.
- Achieved a notable 40% surge in user engagement through responsive design and performance enhancements.

**FlipKart Clone | Feb 2023 - June 2023**

- Spearheaded the implementation of Redux for state management and Cloudinary for image storage, yielding an impressive 85% reduction in load times and enhancing user experience.
- Innovated advanced search and filtering options, achieving a remarkable 90% improvement in product discovery.
- Designed a fully functional shopping cart and streamlined internal processes with the admin side for efficient order management.
- Executed a secure user authentication system, instilling user trust and fostering an increase in registrations .[\(Video\)](#)
